New priorities in the Asia Pacific region led to the appointment of Anthony and his team to lead a project across 12 countries for a significant bank. Together with the joint project team, Anthony created a strategic plan for rapid growth along with a new management structure, including the creation of four sub-regions, new pan-regional roles and a new management dashboard.

Working across 17 countries including India, China, Japan, Hong Kong, Singapore and Australia, Anthony led a program to position the Asia-Pacific region (comprising over 10,000 employees) as the growth engine for the global business. Anthony was the facilitator in a multi-partite strategic planning process to reform the governance of remote Australia. Client testimonials

“ Over the past year I have been involved in a series of meetings which have been facilitated by Anthony Mitchell of Bendelta. This has included meetings...involving Indigenous and non Indigenous participants and included a large group (about 100) at the Garma Festival earlier this year. Anthony's facilitation skills were vital to the success of each meeting. As a sometime sceptic of facilitators, although it is a role I have played often, the source of my scepticism was the many poor examples I have seen. Anthony has restored my faith in the value of external facilitation and I have been particularly impressed by his capacity to work in a cross cultural environment. I have no hesitation in recommending him in that role.
